DETAILED ACTION

Response to Amendment

Applicant's arguments with respect to the amended claim 1 and new claims 39-40 on 8/14/2006 have been considered but are moot in view of the new ground(s) of rejection. Therefore, this is Final action.

Claim 1 is cancelled. Claims 3 and 5-38 are withdrawn. Claims 2, 4 and 39-41 are now pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 2, 4 and 39-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Fukuta et al. (US6903794B2).

In regard to claim 1, Fukuta et al. teach (Fig. 1) a display device comprising

- a display panel 10
- another member 11/11b/20 different from the display panel, which is mounted on the back surface of the display panel;

Art Unit: 2871

- a first board (flexible substrate 3) mounted a connector (an external connection terminal 4a), which allows inputting of video data thereon and
- a second board (connection electrode 15) mounted with a display control circuit (a semiconductor element 6) to be connected to the connector 4a thereon

wherein

- the first board and the second board are physically separated from each other
- the second board is arranged to be brought into contact with back surface of a region of the display panel except for a display portion,
- the first board is arranged to be brought into contact with back surface of the another member

wherein

Claim 4:

- an area of the second board is set smaller than an area of the first board.

Claim 39:

- the another member is a frame holding the display panel, and a backlight (11a and LED 16) is put between the frame and the display panel PNL.

Claim 40:

- each of the first board and the second board has a connector to connect the first board to the second board.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2871

2. Claims 2, 4 and 39-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Terao et al. (US6342932B1).

In regard to claim 1, Terao et al. teach (Fig. 3) a display device comprising

- a display panel 11
- another member 10/15/22 different from the display panel, which is mounted on the back surface of the display panel;
- a first board (electrode on the surface of display panel 11 inherently makes electrical contact to the flexible circuit board 12) mounted a connector (the flexible circuit board 12), which allows inputting of video data thereon and
- a second board (PCB 20) mounted with a display control circuit inherently on PCB 20 to be connected to the connector 12 thereon.

wherein

- the first board and the second board are physically separated from each other
- the second board is arranged to be brought into contact with back surface of a region of the display panel except for a display portion,
- the first board is arranged to be brought into contact with back surface of the another member 20.
- the second board is arranged to be brought into contact with back surface of a region of the display panel except for a display portion,
- the first board is arranged to be brought into contact with back surface of the another member.

wherein

Art Unit: 2871

Claim 4:

- an area of the second board is set smaller than an area of the first board.

Claim 39:

- the another member is a frame 10 holding the display panel, and a backlight (15 and 22) is put between the frame and the display panel PNL.

Claim 40:

- each of the first board and the second board has a connector to connect the first board to the second board.

Claim 41:

- the frame 10 has a through hole accommodating said connector.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2871

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
